Carry out SSRA

- ☐ Assessor to complete a Site Specific Risk Assessment, using provided template.
- ☐ Header and footer.
- ☐ Hazards and controls relative to site, task and equipment.

Carry out environmental assessment

- ☐ Environmental risks to site identified
- ☐ Methods to minimise risks explained.
- ☐ Additional risks not identified on site, (that may occur in typical assessment situations) to be discussed.

Knowledge of a range of applicators (including pump types, liquid/air flow, controls, components, induction systems)

Applicable to equipment used for the TE and questioning to cover knowledge of variations:

- ☐ Operating controls
- ☐ Applicator components
- ☐ Common pump types
- ☐ Liquid flow
- ☐ Air flow
- ☐ Operating differences between fixed forward speed and variable forward speed (rate controller) applicators

Knowledge of machine preparation and safe driving considerations

- ☐ Pre-use checks to prime mover
- ☐ Compatibility and security
- ☐ Safe driving
- ☐ Contact with obstacles (e.g. overhead power lines)

Knowledge of operator protection, sealed cab/open platform and PPE requirements and standards

(Please note: Assessor to identify nozzle, explain when it would be used and interpret the markings. Additional detail can be obtained / interpreted from an appropriate nozzle chart.

Knowledge of downward air assistance components, their use and settings for application

- ☐ Air bag/sleeve and outlet components
- ☐ Air keeps the bag/sleeve inflated over its entire length
- ☐ Increasing air volume may improve penetration of the spray into the crop and/or lead to excessive drift
- ☐ Inclining nozzle/air outlet forward will open the crop canopy and counteract the effect on the spray created by the forward speed of the sprayer and counteract the effect on the spray created by a head wind
- ☐ Inclining nozzle/air outlet rearward will open the crop canopy and counteract the effect on the spray created by a tail wind

Interpretation of two appropriate product labels

- ☐ Product label 1
- ☐ Product label 2

- ☐ Calibration method (carried out):
 - Application volume
 - Amount of water for area
 - Amount of pesticide for area
 - Amount of pesticide for full tank

Complete calibration test paper

- ☐ Calibration test paper successfully completed
Note to TV: The assessor is expected to complete all the calibration test paper exercises. A marking sheet range has been produced to allow for variations in methods used and rounding up/down.
